

TUDOR NOW HAS “WiiHABILITATION”

The popular **Nintendo Wii** system is fast becoming the newest craze in rehab for patients recovering from **STROKES – BROKEN BONES – SURGERY – BALANCE ISSUES** and many other types of injuries. This gaming console adds a bit of fun to their rehab session, while fine tuning their motor skills as well as working with the patient’s balance and coordination techniques.

According to an article in the American Physical Therapy Association Magazine, therapist around the nation have been introducing the Wii to patients. This has led to a dramatic increase in treatment compliance and an all-around satisfaction in their therapy sessions.

If you are looking for those outstanding results when you recommend Physical or Occupational Therapy for your patients, then TuDor Physical Therapy Centers is the answer for you.

TuDor is proud to say that the Wii Gaming System is now available at all of our Centers. “It’s all about getting the results you need and making therapy interactive and fun.”
